

CAPABILITY STATEMENT

StoneWood Labs is founded by veterans of the 780th Military Intelligence Brigade. We fully understand the importance of securing and safeguarding mission critical systems and assets.

Business Summary:

StoneWood Labs is a small woman-owned business that was founded in the beginning of 2022. Our company primarily sells cybersecurity related products and offers consulting services to the federal government and private sector. Products and services are designed to be tailored to the customer's environment. This offers savings as the customer does not need to purchase additional network or hardware devices to incorporate our products and services.

Capabilities:

Our team has significant experience in automation and CNO. In addition to experience identifying vulnerabilities that pose a potential risk to a customer's network, and creating products and reports for the government, detailing cybersecurity risks and suggested solutions. With up to date knowledge on new threats and capabilities, StoneWood Labs can recommend and develop security solutions, strategies, and new security best practices within a company's work force to help reduce a company's attack surface.

Expertise:

Comprised of a small agile team, StoneWood Labs is capable of adapting products to meet a customer's needs in a timely fashion. Together our team has over 15 years of experience in the industry, working for organizations to include the U.S. Army, DISA, intelligence agencies, Amazon, FireEye, Splunk, and Palo Alto Networks.
